User Manual:

DuploHex

LAIG Grupo 07 Turma 3

João Pedro Bernardes Mendonça 201304605
Luis Figueiredo Caseiro 201306125

Getting Started:

1. Using sicstus consult the prolog file server.pl in the gameengine folder.
2. Execute the application
3. Click a ligtht colored piece and selec a hexagon tile to move.

Rules:

Light colored piece always start. Every player has to place one piece, either a disk or a ring and move a piece each turn.

The objective is to create a line uniting both edges either vertically or horizontally. Disks can be moved into rings to complete the line.
